WORK EXPERIENCE

HOPPR (Remote)

Software Engineer (Nov. 2025 – Present)

- Developing user interfaces, APIs, and cloud services to deliver a scalable, reliable, and secure HOPPR Foundry platform to leverage AI models for medical imaging in a fast-paced startup environment.
 - Rapidly adapted and reskilled after corporate restructuring to absorb critical back-end responsibilities and priorities, transitioning from front-end focus.
 - Spearheaded cross-team effort to define and align front-end Spec Driven Development (SDD) from scratch, gaining UX, Product, and Regulatory buy-in.
 - Within first 8 days of hire, quickly onboarded and delivered new Inference UI feature to Foundry for demo showcase at RSNA 2025, an international radiology conference with ~38,000 attendees.
- Skills & Tools:** TypeScript, React, Python, Playwright, AWS, Agentic Development

Akamai Technologies (Remote)

Software Engineer II (April 2023 – Nov. 2025)

- Promoted from SWE I within first 6 months on the team due to strong performance.
- In addition to all core responsibilities of SWE I, demonstrated leadership as an IC by:
 - Primary Technical Lead - LKE Enterprise (2025):** Led UI development for Linode Kubernetes Engine Enterprise (LKE-E) product. Defined and executed UI multi-phased requirements by creating architecture-aligned tickets and project plans, writing high-priority code, delegating work, and managing stakeholder collaboration to release Phase 1 (June '25) and Phase 2 (Sept. '25) to production.
 - Analytics Integrations & SME (2023 - 2025):** Led the integrations of Pendo and Adobe Analytics into Cloud Manager to enhance our analytics collection, collaborating with vendors, our UX research team, Product, and other developers across the company to assist them in their analytics integrations.
 - Reseller Account Switching (2024):** Served as secondary technical lead for the Parent/Child account switching feature, enabling >780 reseller contracts to seamlessly switch between 100+ customer accounts in Cloud Manager with a single login credential, streamlining a previously manual process.
 - International Pricing Support (2023):** Led implementation of dynamic Data Center-specific pricing in Cloud Manager, enabling support for two new international data centers and regional expansion in Q3–Q4 2023.

Akamai Technologies (Remote)

Software Engineer I (Sept. 2022 – March 2023)

- Developed and maintained the Cloud Manager web application, an open source front-end platform for deploying and managing cloud virtual machines and services, serving 10,000+ daily users.
- Conducted daily code reviews for a 10-person dev team, driving adherence to UX and coding best practices and proactively preventing regressions.
- Oversaw release testing, deployment, and scrum leadership activities in a 2-week rotational "fire chief" role to ensure on-time delivery and stability.
- Partnered cross-functionally with UX, Marketing, Product Management, and API teams to build accessible, responsive components and features aligned with brand guidelines, while maintaining parity with the Linode API.
- Skills & Tools:** TypeScript, React, TanStack, Vitest, Cypress, Storybook, Jenkins, GitHub Actions, Figma, DevTools, Web Analytics, Responsive Design, Accessibility (A11y)

Intel Corporation (Hillsboro, OR)

GPU Software Development Engineer (Aug. 2021 – Sept. 2022)

- Led software development of a full-stack web app internal tool to report insights on performance and characteristics of graphics workloads running on CPU and GPUs.
- Collected user requirements and feedback from performance engineers.
- Skills & Tools:** React, Node, MongoDB, Python, SQL, Jenkins

SKILLS

Programming Languages

TypeScript HTML & CSS (No)SQL
JavaScript Node C & C++
Python + frameworks (Flask & Django)

Libraries

React Material UI TanStack Query
Yup Formik React Hook Form
Mock Service Worker (MSW)

Testing

Unit: Vitest, Jest, Pytest
Integration & E2E: Cypress, Playwright
Component: Cypress

UX Research & Design

Figma Heuristic Evaluation
Survey Contextual Interviewing
Miro Competitive Analysis
Storyboarding Wireframing

Tools/Technologies

Git Launch Darkly UNIX
Jira Sentry Vite
Jenkins Postman Storybook
Cloud (Linode and AWS) Claude

EDUCATION

M.S. in Information

University of Michigan - School of Information (UMSI)
Ann Arbor, MI

4.00 GPA

Focus: User Experience/User Interfaces
Attended on Full Tuition Scholarship

B.S. in Computer Science

Pacific University
Forest Grove, OR

Summa Cum Laude, 3.92 GPA

Double Minors in Psychology and Philosophy

SERVICE & LEADERSHIP

Speaker at MidCamp 2020

April 2020

Presented conference talk "Come to the Dark Side (of UX), We Have Cookies" on recognizing, categorizing, and combating dark patterns in UX design.
